EVALUATION OF CONTENT

1. Borna (K-39)

25X1X6

a. The Hydrogenation Plant at Borna is occupied by Red Army tank units, and, apart from the synthetic gasoline and oil produced there which is transported to the USSR by rail via Brest-Litovsk, a very large reserve gasoline and oil dump is also located in the works.

b. Two thousand troops were stationed in the town until 2 January 1947 when they all left with their tanks. Fresh units are expected to arrive.

2. Lauchhammer (A-13)

A large gasoline and oil dump and a vehicle park containing approximately 150 trucks are located in the premises of the Lauchhammer Steel Works.

3. Demobilization

Considerable numbers of Red Army troops have been demobilized and returned to the USSR during recent months. All these troops must first pass through a Demobilization and Clothing Center at Meissen, from where they proceed in large groups by rail to USSR. Approximately 6,000 men pass through this center at Meissen per week. By comparison the flow of replacements into the Russian Zone is extremely small.

4. Signboards

a. Dresden - Neustadt:

KHOZ - VO  
BOGOLYUBOVA.

(pointing towards Radebeul).
